OBJECTIVE

Aspiring Web Developer with a strong foundation in programming, database management, and full-stack development. Proficient in CSS3, HTML5, JavaScript (ES6+), REST APIs, React Hooks, Context API, Redux, Node.js, and MySQL, with hands-on experience in designing and optimizing databases for scalable applications. Passionate about problem-solving, debugging, and building efficient, user-centric web solutions. Seeking an entry-level role to contribute my development skills in a collaborative environment.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
- **Frameworks/Libraries:** React, Node.js, Express, Amplify
- **Databases:** MySQL, AWS DynamoDB
- **Tools:** Git, GitHub, Firebase, Figma, Blender

SOFT SKILLS

- Problem-Solving
 - Adaptability
 - Collaboration
 - Time Management
-

EDUCATION

Bachelor of Computer Applications 2023 -

Aggregate of semester 1st to 4th 86.65%

Pre-University Course April - 2022

1st Year: 98% 2nd Year: 51%

10th Grade (High School) June/July - 2020

Final Percentage: 60%

PROJECTS

Save Links

An interactive web page for saving and managing links as customizable cards, displaying user-defined text, URL, color, and Fetches favicons dynamically using the Google Favicon API. Features include importing and exporting links for easy backup and transfer.

Tech Stack: React, Local Storage Indexed DB

Deployed using **GitHub Pages** → /save-links

Hotel Reservation System

A full-stack hotel booking app that streamlines the reservation process, enabling seamless customer registration, real-time room availability checks, and secure bookings

Tech Stack: React, Node.js, MySQL

Deployed as a static website on **GitHub Pages** → /The-Continental
